SANGOMA TECHNOLOGIES NAMED BEST OF SHOW WINNER FROM INTERNET TELEPHONY CONFERENCE & EXPO FALL 2005

TORONTO – December 1, 2005 – Sangoma Technologies Corporation (TSXV: STC) (www.sangoma.com), a leading provider of connectivity hardware and software products for VoIP, TDM voice, WANs and Internet infrastructure, has been named winner of Technology Marketing Corporation, TMC's, prestigious "Best of Show" award at the recently concluded Internet Telephony Conference & Expo Fall 2005 at the Los Angeles, CA Convention Center.

The awards recognize innovative technology and creative product feature sets. Forward-looking products that serve as a base upon which to build future developments in the VoIP industry were awarded.

"Companies such as Sangoma are pioneers and are responsible for the amazing growth in the VoIP market this year," says Rich Tehrani, president and group editor-in-chief of TMC. "Selecting Best of Show winners each year becomes more and more difficult as the solutions displayed on the exhibit floor become more and more impressive."

"We were excited to learn that we have been chosen as an award winner," adds Sangoma Technologies President and CEO David Mandelstam. "At the show we launched our new A104d PCI card and showcased the soon to be released, scalable 24-port, A200 FXO/FXS analog card."

The A104d includes a miniature voice enhancement sandwich board. The voice enhancement capabilities added to Sangoma's standard AFT-based A104 card include: G.168-2002 echo cancellation with 1024 tap/128ms tail per channel on all channel densities, DMF encoding/decoding and tone recognition, voice quality enhancement and adaptive noise reduction.

"Designed at Sangoma's research and development labs, the A104d PCI card is engineered for today's demanding soft PBX, IVR and VoIP applications, such as Asterisk™, Yate™, and OPAL, offering a new price/performance standard unparalleled in our industry," says Mandelstam.
